WORK EXPERIENCE

Software Developer

Synergy Interface Ltd.

01/2018 - Present *Dhaka, Bangladesh*

Software Company

Achievements/Tasks

- Designed and implemented a robust POS system using latest dotnet core, SQL server, and angular with clean architecture, repository, message queue & following the best practices. Improved efficiency by optimizing backend architecture for existing desktop version.
- Took part in maintain & modify existing HRMS solution including organization, HR policy, payroll etc.
- Actively involved in developing inventory ERP software focused on distribution and supply chain management.
- Applied complex SQL queries, designed APIs, and utilized asynchronous programming for efficient data handling.
- Contributed to multiple core modules, including sales, promotions, transfer, delivery, receive, damage, user management and many more.
- Applied complex SQL queries, designed APIs, utilized asynchronous programming for efficient data handling.
- Responsible for implementing complex business requirements into the application and designing mock-ups for features
- Integrations, Modifications and bug solving for existing desktop POS according to clients requirements.
- Conducted thorough code reviews and managed code merging and project maintenance using SVN
- Visual Studio 14,22, VS Code, SSMS19, Postman, SVN etc.

EDUCATION

BSc in Computer Science & Engineering

BRAC University

2013 - 2017 *Dhaka, Bangladesh*

Higher Secondary Certificate (Science)

St. Joseph Higher Secondary School & College

2010 - 2011 *Dhaka, Bangladesh*

Secondary School Certificate (Science)

Mohammadpur Govt. High School

2008 - 2009 *Dhaka, Bangladesh*

SKILLS

C# | Asp.net 8 | Asp.net framework, .NetCore | Web API | Angular, Typescript | Web app, Desktop app | EF, linq | Sql query | Azure | DevOps | Cloud, Microservice, Docker, Kubernetes | Message Queue | Claude | Playwright | AI automation | Git, SVN | JavaScript | Reactjs, Redux, Saga | VS14,22, SSMS19, Postman, VSCode etc.

PROJECTS

Shopping Cart (.Net 8, Clean Architecture)
- Self project, live demo: shopping-cart-by-towsif-patwary.netlify.app

Cloud Pos (.Net8 Core, WebAPI, Angular 16, MsSql)
- Sales, promotions, receive, deliver, damage, inventory, user management etc

Universal Medical Record (.NetCore, Angular, MsSql)
- Medical recruitment system USA client based

BKB Admin portal (Angular)
- Banking system

BlockChain
- Developed blockchain wallet desktop app - ERC20 token using WPF
- Developing Non Fungible Token on ERC721 using solidity, nodejs etc

ERP software (.Net framework, Angular, Oracle)
- Merchandising module- row material/product initialization to finished good
- Material management module- requisition, purchase, utilizations etc.

Bizness Roots - Inventory ERP (.Net 4.5, JQuery, MsSql, EF)
- Focused on distribution & supply chain ERP. Purchase, sales, reports etc

E-commerce website self project (reactjs)
- E-commerce, cart management etc.

Restaurant app self project (.Net, Angular)
- Angular 10, .Net 4.6 Web api, MsSql, Material (UI), Ado.Net, EF etc.

Easy images by search- using external api (reactjs)

Point Of Sales (C#, DotNet 4.5 MVC, JQuery, MsSql)
- Layer architecture, SOLID principles, repository pattern, entity framework
- Setups, Operations (Sales, Discount, Tax, Purchase, Stock mgt.), Report

CERTIFICATES

Complete Blockchain development (2021)

Professional Application Development from BITM (2018)

Asp.net MVC, Razor, jQuery, MsSql etc.
